FERNO MEGASUS Trolley

Lift and transport heavier patients safely – without risk of operator injury

Bariatric trolleys need to perform two vital functions – keep the patient comfortable and secure, and ensure that the operator can perform their job easily and without risk of injury. **The Megasus** is Ferno's highly effective solution to this challenge, designed to carry patients up to 400kg and accommodate their associated body mass.

The trolley's configurability, high load capacity and excellent manoeuvrability also afford operators another major advantage – it allows a standard ambulance to attend incidents which might otherwise have required a specialised vehicle.

- **Lift heavier patients smoothly and easily** – 400 kg in lowest position, 200 kg raised
- **Additional comfort and space** – extendable cotsides, allowing a larger mass capacity whenever required
- **Excellent security** – Complete four-point body harness and leg restraints
- **Operation without strain** – dual action raise/lower hydraulics, gas-strut assisted backrest, extendable push/pull handles at both ends
- **Easy to clean** – AB coated frame, BioSafe strapping, PR mattress and side pads

Part Nos:

MEG-NMI-AB/PR Megasus c/w Grey 2-section AB-PR Mattress, extending side arms, 2 Part NMI Track Lock

MEGBIO-NMI-AB/PR Megasus c/w Grey 2-section AB-PR Mattress, extending side arms, Biosafe restraints, 2 Part NMI Track Lock
