FERNO BabyPod II

Infant Transportation

Transfer newborns up to 8kg with enhanced stability – even during bumpy conditions

Transferring neonates presents particular challenges. You need to ensure the temperature remains comfortable and the environment is free from infection. **BabyPod II** fulfils these criteria while providing remarkable stability through special shock absorbing technology – making it ideal for transfers involving fixed and rotary winged aircraft as well as cars and emergency vehicles.

- **Simple to manoeuvre** – easily lifted in and out of vehicles by two people
- **Unrivalled stability** – with patient positioning vacuum mattress and safety straps
- **Exceptionally versatile** – ideal for use in hospital transfers, relief operations, emergency midwifery, neonatal revival cases, ambulance car or air transfers
- **Convenient to use** – fully X-ray and MRI compatible... and needs no electricity
- **Highly compatible** – can be used with all major ventilators and enables the addition of improved O2 environment and syringe pumps
- **Excellent hygiene** – body constructed from carbon fibre for enhanced infection control
- **Proven performance** – crash tested to the standard CEN 1789 (10g in six directions)

Part Nos:

BPOD2-EV04	BabyPod II, including the below accessories
