## Basket Stretcher Range

**Easier to handle, safer for casualty and rescuer – wherever an incident occurs**

Injuries have a habit of happening in inaccessible areas, and sometimes casualties need to be carried for extended periods or over considerable distances to the nearest road or air access point. Situations like these demand stretchers that are comfortable to hold, easy to manoeuvre and as light as possible.

**Based on a modern upgrade of a classic military-style stretcher, Ferno's Titan Basket Stretcher range meets these demands perfectly. Stretchers are available in stainless steel or ultra-lightweight titanium – the ultimate in strength vs weight – with a full range of accessories for each.**

- **Choices for all budgets** – choose stainless steel or titanium to cut the weight by at least 50%
- **Stronger and more reliable** – back support moulded from durable high-density polyethylene
- **Safe and secure** – with 4 stretcher restraint straps to keep casualties firmly but gently secured
- **Can accommodate larger patients** – wider version of the Regular Titan Stretcher available in stainless steel
- **More options than ever** – single piece or split (ideal for helicopter rescue), regular or tapered, now complete with StratLoad on all models as standard
- **Spacious and versatile** – will hold various Scoops and Spinal boards, see table below;

#### Part Nos:

##### Titan Stainless Steel (SS)

11-0101	Titan SS Regular
11-0100	Titan SS Tapered
11-0103	Titan SS Split Regular
11-0104	Titan SS Split Tapered
