TRAVERSE **Gazelle** Rescue Stretcher

Strength, durability and versatility... at an affordable price

Compromising on strength and durability simply isn't an option when you're selecting appropriate rescue stretchers – but in the real world it simply isn't always possible, or even necessary, to spend your budget on the highest-specification titanium models...

The **Traverse Gazelle Stretcher** is an excellent option when you're looking to combine durability with value for money. Its intelligent design makes the most of geometric alignment and advanced construction methods to deliver ultimate strength as well as outstanding value.

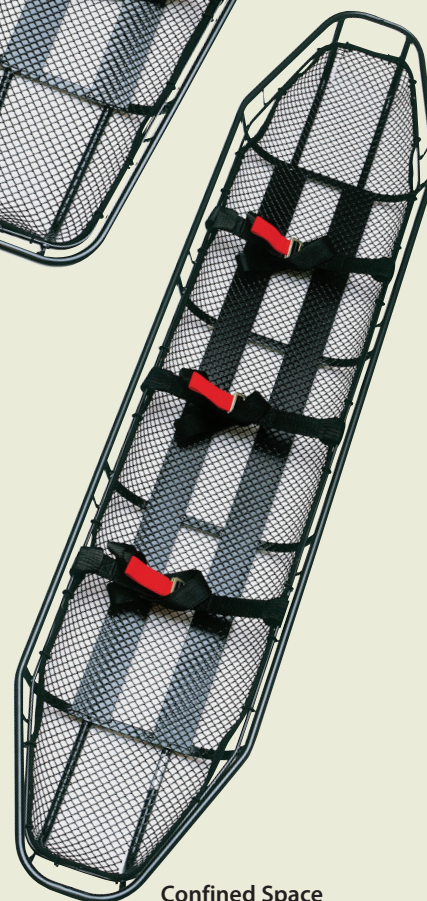

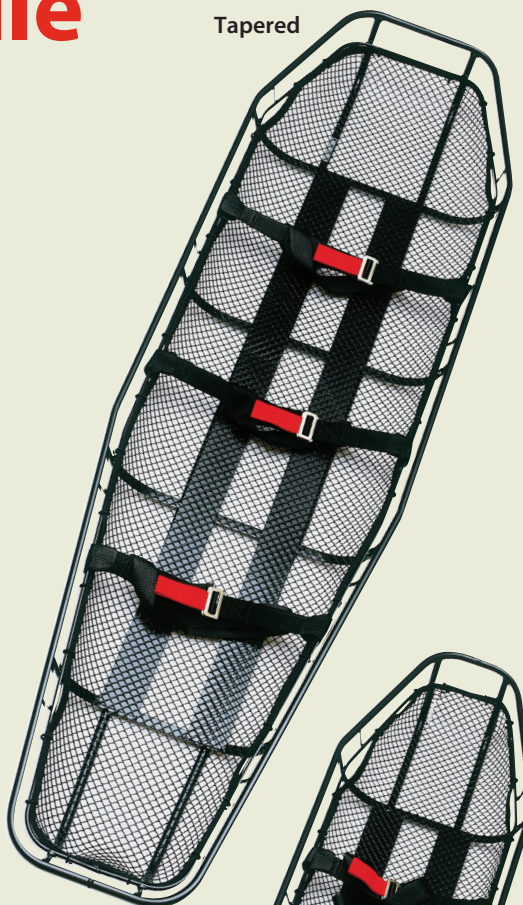

- **Exceptional durability** – made from all-carbon-steel with a MIG-welded frame for added strength, 19mm top frame and lower rails
- **Incredibly versatile** – use the regular model with any spineboard
- **Choose the version that best suits you** – Regular, Tapered or Confined Space
- **Go almost anywhere** – Confined Space model allows entry into most confined spaces
- **Safe and comfortable** - Durathene netting replaces old-style wire, so there are no sharp edges
- **Spacious and versatile** – will hold various Scoops and Spinal boards, see table below;

	Gazelle
Millennia board 18"	✓
Scoop EXL & S-265 (extended to 2nd position)	✓
